

<p><b>Welcome</b> to Network Rail's signal box database. These spreadsheets attempt to catalogue all the existing former mainline signal boxes in the country, whether operational or redundant, preserved or on the national network.</p> <p>The starting point for developing this database was the Signalling Record Society's 'Signalling Atlas &amp; Signal Box Directory' and we gratefully acknowledge the society's cooperation in this project.</p> <p>Inevitably when dealing with such a broad subject, errors and omissions occur. If you spot any, please let us know so that we can update the information accordingly. You'll find the contact link on the main webpage.</p> <p><b>Note: Boxes on narrow gauge lines are not included unless they are former standard gauge boxes that have been relocated.</b></p>																																																																																																																																																																																																																																																																																														
<table border="1"> <tr> <td> <p><b>Key to box 'types'</b></p> <p>(*) = some non standard features            (+) = significant alterations to appearance of box            C/T = Control Tower            PB = Power Box            N/S=non-standard</p> </td> <td> <p><b>Key to 'Refurbished'</b></p> <p>R* = restored to good 'original' condition,            RA = refurbished to original style            RB = refurbished with replacement PVC windows close to original style            RC = refurbished with replacement PVC windows of a quite different design            RD=refurbished with replacement PVC windows of a quite different design and other major exterior changes</p> </td> </tr> </table>							<p><b>Key to box 'types'</b></p> <p>(*) = some non standard features            (+) = significant alterations to appearance of box            C/T = Control Tower            PB = Power Box            N/S=non-standard</p>	<p><b>Key to 'Refurbished'</b></p> <p>R* = restored to good 'original' condition,            RA = refurbished to original style            RB = refurbished with replacement PVC windows close to original style            RC = refurbished with replacement PVC windows of a quite different design            RD=refurbished with replacement PVC windows of a quite different design and other major exterior changes</p>
